Manahil Ameer | Web Developer

Personal Details

Name: **Manahil Ameer**
Mobile: **03374961966**
Email: **manahil1054@gmail.com**
LinkedIn: **https://www.linkedin.com/in/manahil-ameer-1054/**

Experience Summary

- 2 years and 4 months of professional experience in Software/Application Development.
- Hands-on experience in **Web Development using Angular.**
- Hands-on experience in **Web Development using Bootstrap CSS.**
- Hands-on experience in **integrating REST API in Web App.**
- Hands-on experience in **creating dynamic forms using Formly.**
- Experience in collaborative teamwork **using GitHub for version control and project management**.
- Hands-on experience in working on a project from scratch.
- Good Exposure to **S**oftware **D**evelopment **L**ife **C**ycl**e.**
- Strong grip on writing manageable and efficient frontend components.
- Capable in Requirement's Gap Analysis from FS/SRS Documents.
- Capable in Reproducing Defects & Reviewing Requirement Specification & Design Specification Document.
- Specification Good knowledge in Agile/Scrum Methodology.
- Good knowledge of Object Oriented Programming and Database concepts.
- Self-motivated and quick learner, willing to adapt to new challenges and technologies.
- Guided junior team members and transferred domain knowledge.
- Took the lead in various processes as the most senior member of the project.

Tools:

Angular JS, HTML/CSS, JavaScript, XML, XSLT, Mulesoft, Postman, Forum Sentry, teamwork, problem solving, project management tools, Strong communication.

Certifications

- Health Insurance Portability and Accountability Act (HIPAA) Certified from **HIPAATraining**

Education

- Bachelor's in computer science from University of Engineering and Technology, Lahore **(2018 - 2022)**
- Intermediate in computer science from Kinnaird College For Women And University **(2016 - 2018)**
- Matriculation in computer science from Akabri Public School **(2014-2016)**

Achievements

- Received the Employee of the Month award at Techlogix for outstanding performance.

Professional Experience

Techlogix Pvt Ltd.   **June 2022 – Sep 2024**

Software Engineer

Project BCBSM: **(Jan 2024 – Sep 2024)**

Blue Cross Blue Shield (BSBS) is a leading health insurance provider in US, covering one-third of the Americans and operating across all 50 states. BSBS has 1000+ APIs that have been developed by various companies using different tools. The Company aims to consolidate all these APIs into a single repository. Currently, the APIs from Mulesoft are being migrated to the Forum Sentry, with new APIs also being developed using the Forum Sentry.

Responsibilities:
- Review & Analyze Requirement Document
- Understand the workflow of API in Mulesoft
- Develop that workflow on Forum sentry using optimal approach
- Convert Dataweave transformations to XSLT Transformations.
- Write unit test cases to test the API endpoints before handing it over to QA team.
- Create custom assertions to verify that API responses and schema
- Manage the development lifecycle and provide fixes for reported bugs
- Collaborate closely with the development team to discuss development tasks
- Provide realistic timelines of each module, contributing to project development planning and deadline setting
- Actively participate in agile meetings, including stand-ups, planning sessions
- Assist Junior Software Engineers in the backend & API development process
- Support the process of UAT, confirming the fulfillment of all predefined acceptance criteria

---

Projects Leap SECP   **June 2022 – Jan 2024**

LEAP is a platform by **SECP** for online services related to company registration, corporate governance, circulars, rules, and complaint submissions in Pakistan. The primary purpose of this project is to increase the efficiency of the corporate sector. We developed this web portal for SECP from scratch, providing ease in processes like Company Name Reservation and Company Incorporation. The portal also facilitates post-incorporation changes. In addition to this online portal for customers, we created an offline portal for SECP officers to manually submit applications.

Project link: https://leap.secp.gov.pk/#/landing-page

Responsibilities:
- Created the baseline for the frontend of the project.
- Reviewed software requirement specifications and design documents.
- Developed manageable frontend components according to functional requirements.
- Created processes adaptable to upcoming changes, as the project is still under development.
- Built dynamic forms using and customizing the Angular Form library, Formly.
- Integrated REST APIs into the web portal to fetch, display, or send data to/from the database.
- Conducted UAT sessions with the client to ensure their satisfaction.
- Took ownership of the process and led initiatives.
- Collaborated with multiple developers on GitHub.

- Analyzed client needs and made recommendations for system enhancements or upgrades.
- Conducted root cause analysis and worked closely with the QA team to resolve defects.
- Managed and tracked issues and enhancements reported by the team on JIRA.
- Ensured best practices were followed throughout the development process.
- Mentored junior team members with technical and non-technical tasks.
